This Article is brought to you for free and open access by the Michigan COVID-19 State Data at ScholarWorks at WMU. It has been accepted for inclusion in Michigan COVID-19 Testing Turnaround Data by an authorized administrator of ScholarWorks at WMU. For more information, please contact [wmu-scholarworks@wmich.edu](mailto:wmu-scholarworks@wmich.edu).

# Testing Turnaround Time

COVID-19 Testing Turnaround Time (TAT) provides data for the past 14 days on the average time it takes for a diagnostic COVID-19 laboratory test to be reported to the state health department. Testing turnaround time data will be updated weekly on Friday mornings.

Michigan Department of Health and Human Services receives results from commercial labs, hospitals, and public health labs. However, public health laboratories perform limited diagnostic testing and disease surveillance for infectious diseases. Total turnaround time is calculated from the difference of the date of the collection of a sample for diagnostic testing (sample collection date) and the date that the laboratory results are received by the state of Michigan (message reporting date) for individuals living in Michigan. The total turnaround time value is calculated by subtracting the date and time of the specimen collection from the time of reported results and is provided in days. Transport time is calculated by subtracting the date and time of specimen collection from the date and time that the laboratory received the specimen for analysis and is also provided in days. One tenth of day is approximately equal to 2.5 hours.

\*A map of the preparedness regions can be found [here](#), for reference.

\* Cells filled with -- could not be calculated because one or both of the values needed to calculate the turnaround time were not valid or not reported.

\* Turnaround time metrics have been calculated based on specimen collection dates and the date test results have been received by MDHHS.

\*Test results may be available to patients and/or providers sooner than the date they are received at MDHHS.

\* Factors that may impact turnaround times:

- \* Method of reporting by labs (i.e., electronic reporting versus manual data files)
- \* Reporting specifications used by labs (i.e., standard versus non-standard reporting templates)
- \* MDHHS capacity processing time during extreme volume report days; this can result in some lag between submission and receipt.
- \*Garcia laboratory values for the past 14 calendar days are inaccurate, and as a result, are falsely driving up state and commercial TAT values. As a result, Garcia lab values are omitted from this report, however the state is working to quickly resolve this issue.

Estimated Turnaround Times for COVID-19 Diagnostic Testing Results Received at MDHHS During Last 14 Calendar Days (through 05/12/2021)

Lab Type	Test Count	Transport Time (Days)	Total Turn Around Time (Days)
Commercial	265,013	0.73	1.57
Hospital	169,156	0.18	0.69
Public Health	6,304	0.45	2.88
SNF	41,660	0.00	2.39
State Total	482,133	0.40	1.32

Estimated Turnaround Times for COVID-19 Diagnostic Testing Results Received at MDHHS During Last 14 Calendar Days (through 05/12/2021)
